

# APP WIJI : Android & IOS Mobile app

## Features

- Configuring sensors and loggers in [ijitrack.com](http://ijitrack.com)
- Viewing the latest data
- Alert management
- Photo of the installation site so you can find it easily

## Rapid integration

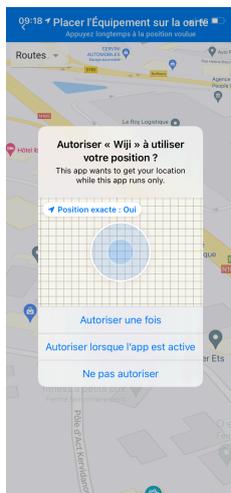

- Quickly configure your sensor in Ijitrack by scanning the QR code on the label.
- Locate the position of your sensor using your phone's GPS.

## Data visualization

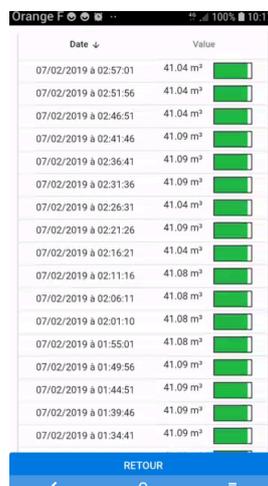

- In addition to quickly adding sensors to your Ijitrack account, the app displays, among other things, the latest data sent by the sensor, the alarms you have configured, and photos taken during installation.

## Real-time notification of alarms received on Ijitrack

- Alarms appear in real time, even if the application is closed. Alerts are acknowledged as in [ijitrack](http://ijitrack.com).
